The main features of air transportation

- Faster transportation....
- Ideal for accessing remote location....
- Security....
- Shorter delivery times....

growth of air transport

demand for air transport will increase by an average of 4.3% per annum over the next 20 years. If this growth path is achieved by 2036 the air transport industry will then contribute 15.5 million in direct jobs and \$1.5 trillion of GDP to the world economy.

Advantages & Disadvantages of Air Transport

Advantages

- Fast speed of transport.
- Rapid service facility.
- Low infrastructure required to establish this service.
- No physical barriers can affect its speed.
- Aviation is very important in Defence service to protect any nation.
- It provides a safe and secure environment to travel by valuable goods.

Disadvantages

- Costlier than other modes.
- Limited capacity of people or goods can move.
- Undependable and risky since it depends on weather conditions.
- Requires skill to fly or operate any aircraft.
- Unfit for cheap bulky goods since travel costs can be higher than the goods cost.
- More accident-prone than other modes.
